D3.6 SECOND REPORT ON TECH- TRANSFER SERVICES TO DIGITAL INNOVATION HUBS

Revision: v.1.0

Work package	WP 3
Task	Task 3.3
Due date	30/06/2022
Submission date	30/06/2022
Deliverable lead	SD
Version	0.1

Authors	Justina Ivanova (SD), Inga Baltaševičiūtė (SD)
Reviewers	Elo Meier (Civitta Estonia)

Abstract	<p>TETRA is an EU-funded project under the Horizon 2020 Research and Innovation programme which aims to offer well-tailored business support services to the third-party beneficiaries of the R&I Actions and the C&S Actions funded under the Next Generation Internet (NGI) - An Open Internet Initiative (H2020-ICT-24-2018-2019) topic.</p> <p>The objective of the task 3.3 is to identify and involve relevant Digital Innovation Hubs (DIHs) from the regions where the project teams are located to provide tech-transfer services to these digital innovation hubs in order for ensuring regional follow-up support that is not limited to the duration of this project and therefore increasing the sustainability of the project results. The following activities will be planned in this task:</p> <ol style="list-style-type: none"> 1. Identification of a local/regional DIH for each team. The existing JRC DIH online Catalogue was used for identification of suitable DIHs for each team 2. If relevant DIH was not found - identification of incubator, hub, or other support organization was completed. 3. Reaching out to DIH and connect them with relevant project team
Keywords	Next Generation Internet, TETRA, DIH, Digital Innovation Hub, matchmaking

DISCLAIMER

The free-of-charge, first-line support provided by the TETRA project aims to help beneficiaries of the “R&I Actions” (co-)funded under the topic H2020-ICT-24-2018-2019 and their third parties to turn their research results into marketable products and services. This support -including support on intellectual property- should not be considered neither as of a legal or professional nature nor substitute to private advisory services.

The tools (website, publications, training or promotional materials, etc.) and the activities of the project shall not be considered as the official position of the European Commission. Neither the TETRA Consortium partners, nor the European Commission, nor any person acting on behalf of the European Commission or the TETRA Consortium is responsible for the use, which might be made of these project tools and services.

EXECUTIVE SUMMARY

Technology transfer refers to the process of moving results from scientific and technological research to the market. Tech-transfer services help facilitate this process. To ensure Tech-Transfer for TETRA beneficiaries (Bootcamp participants), task coordinators were connecting them with Digital Innovation Hubs (DIHs) whose one of the main activities is to encourage and support the technology transfer. After evaluating the impact created by this Task (mentioned in great detail in D3.5) it was decided to expand this process to include a much broader list of organisations which could benefit TETRA Innovators.

Task progress before the amendment | The main tool for identification of Digital Innovation Hubs was the existing JRC DIH online Catalogue¹ (hereinafter - S3 platform) as it allows to filter DIHs based on their location, technical competencies and services provided, TRL focus, market sectors, and evolutionary stages. Three key criteria were chosen to select DIHs for matching with project teams: location, TRL level and industry. In total, in batch 1 and 2 combined, 11 teams were connected to the Digital Innovation Hubs (DIHs) after successful introductions and expressed interest by both parties.

While identifying and contacting relevant DIHs task coordinators encountered an unforeseen issue of unresponsiveness of most of the DIH representatives. Task coordinators tried various means of contact, i.e., emails, and phone calls, however, it still did not bring the foreseen results. This led the task coordinators to pivot the initial approach and identify relevant incubators, accelerators and other start-up support organizations as well as hubs.

Task progress after the amendment | After shifting focus to a broader start-up support ecosystem, a new approach needed to be taken. All Innovators who graduated from the TETRA Bootcamps received a list of their relevant ecosystems mapped with an offering to be matched on behalf of TETRA with anyone they find relevant. These mapped lists include all types of organisations and programmes - from pre-incubation to very intense high TRL accelerators, government funding schemes, various public and private contests, VC funds, start-up communities, consulting and mentoring organisations, NGOs, not to forget relevant NGI calls and other EC projects. Each of the 18 mapped countries plus an additional international list had anywhere from 17 to almost 40 relevant organisations that Innovators can reach out to or ask TETRA project to make the first introduction.

These extensive ecosystem lists are attached as an **Annex 1** to this deliverable and also, with the rest of the exploitable tools and materials, will be publicly available for any Innovator to find at any time on TETRA website or by contacting Task coordinators.

1. CONCEPT OF TECH-TRANSFER SERVICES

1.1 OBJECTIVES OF T3.3. TECH-TRANSFER SERVICES TO DIGITAL INNOVATION HUBS

The objective of the TETRA project is to develop and implement a series of business-support activities targeted at 'R&I Actions' and their third parties funded under the topic H2020-ICT-24-2018-2019 to help turn their research results into marketable products and services and prepare them for success in the marketplace.

As EC defines, DIHs are organizations that provide full service and help companies become more competitive with regard to their business/production processes, products or services using digital technologies. DIHs provide access for their members to technical expertise and equipment so companies could run tests before investing heavily into the development of their technology. They also provide innovation services, such as advice about funding options and financing, training and skills development that are needed for a successful digital transformation.²

Therefore, DIHs could be key partners for any project team aiming to transfer their technology to the market.

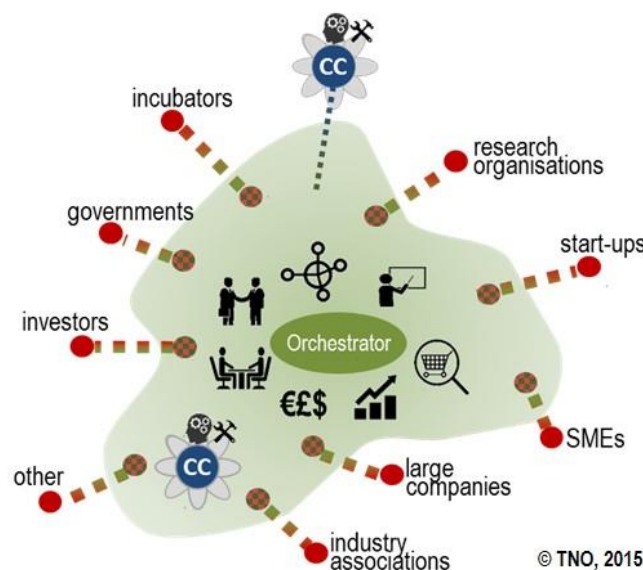

FIGURE 1 STRUCTURE OF DIH

For the above-mentioned reasons, TETRA business support activities include tech-transfer services, i.e. facilitating the connection of project teams with Digital Innovation Hubs. For this project, DIHs are relevant intermediaries that could provide sustainable support during and especially after the end of the TETRA project enabling the technology transfer.

² <https://ec.europa.eu/digital-single-market/en/digital-innovation-hubs-dihs-europe>

DIHs are a relatively new type of organization - The EU proposed DIHs as a key priority in the Digitising European Industry Initiative which was adopted in April 2016.³ Thus, DIHs and the services they provide are not very well known among start-up communities. Currency, S3 Platform provides information about 370 DIHs that are fully operational but 221 are still in the preparation phase.

The objective of this task was to identify and involve relevant DIHs from the regions where the project teams are located to enable the technology transfer and ensure regional follow-up support that is not limited to the duration of this project and therefore increases the sustainability of the project results. S3 Platform was used to identify DIHs to be connected with projects teams. The platform has Digital Innovation Hubs Catalogue. It was set up to give a comprehensive picture of DIHs in the EU. Today, catalogue provides details about more than 400 DIHs, over 200 of which are fully operational.

For the first batch of project teams 73 DIHs were identified. Location and services provided of each DIH were evaluated and one DIH per bootcamp participant was selected. Introduction of DIHs to participants took place in M19. Unfortunately, 9 teams weren't connected to any DIHs due to unresponsiveness of representatives and lack of relevant DIHs. 8 teams from batch #1 were connected to DIHs, 1 team was introduced to a H2020 blockchain project and 9 remaining teams were introduced to the relevant incubators instead.

From the second batch of TETRA teams, 17 in total, only 3 teams were successfully connected to the relevant DIHs. All teams were matched with at least 1 DIH, usually more, unfortunately, there were several reasons why matches were not successful. These reasons were usually one of the following:

- DIH did not respond to any inquires from TETRA;
- DIH did respond but were uninterested in TETRA Innovator;
- DIH did respond and were interested at first, unfortunately when there was time to be matched, communication stopped.
- DIH did respond but TETRA Innovator stopped responding.

After this only partially successful implementation, this Task has been amended and the new methodology will be introduced in the following sections.
Key differences in the new methodology approach:

- A desk study has been done to identify relevant NGI-relevant support programs (accelerators, incubators, etc) for the teams, taking into account the geographical location, target sector, industry and maturity level of our teams;
- Mentors consulted to gather a tailored selection of the most relevant programs for teams. This information was collected from mentors and included in the masterplans;
- Additionally, dedicated relevant innovation support organisations (incubators, innovation centres, business support centres, etc.) in the same region as the teams mapped, identified and contacted in order to introduce them to the teams to discuss possible follow-up support services outside the scope of this project.

³ <https://ec.europa.eu/digital-single-market/en/digital-innovation-hubs-dihs-europe>

1.2 DIH AND STARTUP ECOSYSTEM IDENTIFICATION PROCESS

Approach in the D3.5 followed the connection of relevant DIHs for the NGI TETRA beneficiaries. Initially, Tech-transfer services to Digital Innovation Hubs located in the same region as the project teams are located were foreseen, however, Digital Innovation Hubs identified and approach were not interested to provide these or any services and did not provide any value-added support to the teams.

In order to provide more applicable support to the TETRA Innovators, a new approach was created. Instead of solely focusing on DIHs, targeted organisation list (Start-up Support Ecosystem) was expanded to include:

- Open NGI calls
- Other EC programmes
- Incubators
- Co-working spaces
- Hubs
- Accelerators
- Governmental agencies
- Think tanks and research organizations
- VCs
- Contests and challenges
- Public funding schemes and grants
- Mentorship programmes
- Communities and clusters
- Various online databases
- Relevant initiatives
- Consulting organisations

Even though the majority of these organizations tend to provide business support rather than technological expertise (as opposed to DIHs) they can also ensure regional follow-up support that is not limited to the duration of this project and therefore increase the sustainability of the project results.

1.3 MAPPING OF THE STARTUP SUPPORT ECOSYSTEM

Mapping of the start-up support ecosystem was done in several stages. First, Task coordinators identified countries of interest to the Innovators. It was done by taking information from their application forms, where they have included the location of their business operations. This served as a stepping stone to start mapping relevant ecosystems. 18 European countries were identified as target or “home” ecosystems, an additional “International” ecosystem was created as a relevant list for all beneficiaries.

Additionally, during the closing mentorship feedback and masterplan development sessions, Innovators were asked to confirm their current

FIGURE 2 MAPPED COUNTRIES

target market. Throughout the duration of the TETRA services, ecosystem maps were developed and updated and more countries were being added when the need occurred. These maps include various organisations, types of which are listed in the section above. TETRA mentors, involved in the mentorship program, were also asked to provide their recommendations for organisations worth adding to the support ecosystem lists and maps were updated. The target for each country list was at least 20 relevant start-up support organisations. In few smaller countries (for example Slovenia) relevant supporting organisations fell just short of the target number 20. Many countries had much wider than anticipated ecosystems mapped, having more than the initial plan of 20 organisations. In total, 445 startup support ecosystem players were mapped. Full lists of each ecosystem are presented in **Annex 1 of this deliverable**.

1.4 DELIVERY OF THE START-UP SUPPORT ECOSYSTEM MAPS

All NGI TETRA beneficiaries who participated in the mentorship program received their ecosystem maps attached to their respective masterplans. This included Innovators from all 4 Bootcamps. For those Innovators who did not participate in the mentorship program (teams that did not win mentorship in Bootcamps #1 and #2), these lists were delivered as stand-alone documents and support to connect Innovators to the mapped organisations was offered. Although this help was offered to every Innovator, most Innovators did not show the need for first introduction initiated from the TETRA side. Apart from being shared with the Innovators themselves, these ecosystem maps are exploitable and will be publicly available as an online resource on the website after the conclusion of the project. Innovators will also be able to access all of the mapped ecosystems.

2. STARTUP SUPPORT ECOSYSTEM PLAYERS

Annex 1 of this deliverable presents all the start-up support ecosystem organisations that were mapped during the whole project duration. In order to better utilize the lists provided, these are the main parts of the tables and how to understand them:

- **Name** column has the name of the relevant organisation or a resource;
- **Type** refers to what kind of organisation or in some cases resource is mapped. All different types are explained in the table below.
- **Short description, services** section shortly presents the organisation and different services it offers.
- **Website** column provides a quick access to the website of the organisation.
- **Email** column provides the available contact information, either a specific start-up support-oriented contact or, in case when specific contact was not easily available, a general contact email. In case organisation did not specify their contact email address and only had contact form available, the direct link to the contact form's location.

Table below provides an overview of the types of support ecosystem organisations and programmes that were included in the ecosystem mapping and their definitions.

Type	Definition
Market entry/ Business support/Mentoring	This type covers NGOs and private organisations that offer mentorship and consultancy (either paid or free) to start-ups/scale-ups to support them in market entry, accountancy, legal matters and many more.
Workshops/Training	Standalone workshops or training provided to the start-ups in both hard (IT, engineering) and soft skills.
Private Funding/VCs/ Business Angels	Various private funding options for start-ups: VC funds, business angel networks, either for equity or equity-free.
Public Funding/Grants	Governmental or non-governmental financing support, regional grants.
Incubator	An organization or place that aids the development of new business ventures especially by providing low-cost commercial space, management assistance, or shared services
Pre-acceleration support	A structured program, fast-track course, designed to develop your idea and get it ready for acceleration.
Accelerator	A start-up accelerator is a business program that supports early-stage, growth-driven companies through education, mentorship and sometimes financing.

Database/Ecosystem map	An extensive map or database readily available for filtering, sorting and finding other relevant organisations. For example, a complete list of VC funds in a given country.
EC Program/NGI	Various NGI calls and running initiatives, cascade funding opportunities through EC.
Community/Hub	Formal or non-formal organisations, associations or groups of startups supporting each other in their business development, organising local events and sharing relevant information.
Cluster	A business cluster is a geographic concentration of interconnected businesses, suppliers, and associated institutions in a particular field.
Contest/Competition	Public or private contests, hackathons, idea competitions, usually with awarded monetary prizes, mentorship.
Think Tank	Institute, corporation, or group organized for interdisciplinary research with the objective of providing advice on a diverse range of policy issues and products through the use of specialized knowledge and the activation of networks.
Research Centres	Establishment founded for doing research. Research institutes may specialize in basic research or may be oriented to applied research.
Other Support	Any other relevant support system or organisation that does not fit into any of the mentioned above.

TABLE 1 ORGANISATION TYPES AND DEFINITIONS

3. CONCLUSIONS

Tech-transfer service activities covered in this report were performed from M1 to M36. As the Task description was updated after noticing a very low response rate from the Digital Innovation Hubs and a lack of interest from those that did respond, the scope of the Task has been expanded and more organisations were mapped in order to provide a broader overview to the Innovators of what resources are readily available and what are the organisations working with the start-ups and scale-ups and offering support. Additionally, feedback on what ecosystem maps are needed was collected from the Innovators themselves. Mentors also supported task coordinators in the mapping process by providing their ideas on relevant organisations start-ups/scale-ups should reach out to. Total figures:

FIGURE 3 OVERVIEW OF THE TECH TRANSFER SERVICES MAPPING

All ecosystem maps were delivered to the TETRA beneficiaries. Furthermore, these ecosystem maps would be useful for other projects, working with supporting start-ups and scale-ups in Europe. Complete ecosystem lists will also be publicly available for exploitation and are provided in Annex 1.

BioInnovation Institutes	Accelerator	An international life science institute. We are here to help you bring your research to market.	https://bii.dk/	bioinnovationinstitute@novo.dk
BioScale	Grants	Whether your business is newly started or you have been running for many years, whether you work with B2B or B2C, we have grant options that suit you and your company's ambitious goals. See the many options below, or get in touch for a conversation about your needs.	https://ehsj.dk/content/ydelsel/bioscale/bd55f752-44d8-4406-a445-7886e4c39493/	info@ehsj.dk
Blazar Capital	Funding	We are a company builder, creating global online leaders	https://blazarcapital.com/	hello@blazarcapital.com
Canute	Accelerator	The programs are for Nordic startups with a proof-of-business in their home market who are ready to scale internationally. During the three days you will get hands-on insights on how to grow your business in the specific market together with a local network that would otherwise take you months to build.	https://www.canute.io/	mia@canute.io
CareTech	Challenge	CareTech CHALLENGE from Danish.Care is building an innovative ecosystem for entrepreneurship and healthcare innovation across Denmark with a focus on the development of new and better technology-based solutions.	https://www.danish.care/aktiviteter/caretech-challenge/	info@danish.care
Climate KIC	Incubator	Our ideation and open innovation programmes help create the conditions to fuel inspiration, garner fresh thinking, raise visibility for or promote engagement with a climate challenge. We help innovation teams identify and define ideas, offer support in putting together a network of partners, and provide seed funding to get things moving.	https://www.climate-kic.org/	nordicevents@climate-kic.org
CoC Playful Minds	Accelerator	CoC Playful Minds is the organization, which develops the programs, that can make this happen. We work with three programs: Playful Skills, Playful Spaces and Playful Innovation.	https://www.cocplayfulminds.org/en/	info@cocplayfulminds.org

Danish games incubator	Incubator	Teaching, supporting and building a network for Danish Games startup companies.	https://gamehubdenmark.com/	alki@gamehubdenmark.com
Dif Innovation Lab	Accelerator	We bridge companies, startups, sports federations, athletes and universities to develop, test and scale new solutions to empower the Danish sports industry.	https://www.difinnovationlab.dk/	amt@dif.dk
Dotcom Capital	Funding	Dotcom Capital houses a family of companies all contributing to a broad spectrum of consumer-insights. Each member of the Dotcom-family enriches the other members through their contribution to a complex, constantly analysed and optimized, high-performance ecosystem of shared customer insights, always and ever expanding.	https://www.dotcom-capital.com/	contact@dotcom-capital.com
DTU Science Park	Accelerator	With more than eight years of experience in accelerating startups, we know what it takes to make your startup successful. Over the past eight years, 89% of Danish Tech Challenge startups are still alive, they have created more than 1000 jobs and raised more than DKK 1.2 billion. DTC is a journey you will not want to miss!	https://dtusciencepark.dk/futurebox/danish-tech-challenge	aj@dtusciencepark.dk
Global Roadrunner	Funding	We invest mind & money in people and businesses, that change people's lives and the way we run business	https://www.globalroadrunner.com/	ln@globalrunner.com
Green Innovation Group	Accelerator	Your transformation towards better and greener solutions is accelerated by bridging you with external innovators and facilitating an open innovation process that prepare you to run industrial innovation pilots in 90 days.	https://www.greeninnovationgroup.com/	https://www.linkedin.com/company/greeninnovationgroup/
Growth Train	Accelerator	We seek companies who want to grow and expand in new markets, find partners or subject matter experts and get matched with investors.	https://growth-train.dk/	cps@businesslf.dk
Maritime Stars	Accelerator	This is how the entrepreneurship program Maritime Stars can be summarized. Specifically, Maritime Stars means that in the course of 3 years, 2019-2021, 15 entrepreneurs will have the opportunity to participate in this unique development program, where the lighthouse companies of the maritime and logistics industry are ready with advice, sparring and development.	https://www.maritimestars.dk/	ah@marlog.dk
Morph Capital	Funding	We take a hands-on approach and spend time every week helping your company in areas where you might be short-handed. No challenge is too much for us and we're experienced across all the areas of start-up need.	https://www.morph.vc/	yk@morph.vc
Northcap partners	Funding	We are looking for the best entrepreneurs in the ICT field and particularly within cloud computing (SaaS), communications, mobile/mobility, online services and e-commerce. We invest in companies with the ambition and potential to grow internationally.	https://www.northcap.vc/	https://www.northcap.vc/contact/

Novo holdings	Funding	Novo Holdings is a Danish private limited liability company wholly owned by the Novo Nordisk Foundation. Established in 1999, Novo Holdings is the holding company of the Novo Group and manages the Foundation's investment assets.	https://www.novoholdings.dk/	https://www.linkedin.com/company/novo-as/
Planetary Impact Ventures	Funding	We are active early-stage investors and venture builders. We help ambitious, scalable startups reach their potential to address the climate and biodiversity crises while building a profitable business.	https://planetary.dk/	pitch@piventures.dk
Propagator	Accelerator	Propagator is the first start-up program of its kind, and differs from the classic accelerator and incubator programs, by being 100% individually customized. Because we basically believe that "one size does not fit all", all start-ups do not have to go through the exact same process. On the other hand, we organize the process so that it continuously matches the needs that you have while you build your business.	https://propagator.co/	hi@propagator.co
Rockstart	Funding	We invest in ambitious founders with groundbreaking visions for a regenerative and sustainable future.	https://rockstart.com/	https://rockstart.com/contact/
ScaleUp Champions	Accelerator	We unlock deep-tech startups' full potential by connecting them with mentors, investors and corporates across Europe. We help you to connect, scale-up and boost your growth!	https://www.scaleupchampions.com/	mbno@dtu.dk
Seed capital denmark	Funding	We believe that new technology can disrupt existing industries and create immense business opportunities. In Denmark we have many outstanding entrepreneurs capable of identifying innovative and value-creating opportunities. We believe that the next generation of tech entrepreneurs will play a key role in shaping Denmark's future, and we are highly committed in working with them to achieve great results.	https://seedcapital.dk/	info@seedcapital.dk
Social Capital Fund	Funding	The Social Capital Fund is based on the idea of investing capital and competencies in companies and organizations that contribute to solving social problems.	https://densocialekapitalfond.dk/	info@socialkapitalfond.dk
Sunstone capital	Funding	Sunstone Life Science Ventures is an independent European venture capital investment firm. Our purpose – and passion – is to seek out, enable and empower the most promising life science therapeutics innovations.	https://sunstone.eu/	lifescience@sunstone.eu
Vækstfabrikkerne	Accelerator	With an exciting environment, Vækstfabrikkerne is for you who have ambitions for your startup and a desire to be part of a local entrepreneurial environment. The growth factories are there to bring together the next generation of individuals and startups that will make a positive difference and grow the business.	https://vaekstfabrikkerne.dk/	info@vaekstfabrikkerne.dk

Vækstfonden	Funding	In close collaboration with banks and domestic and international private investors, we discover and develop the companies that Denmark cannot afford to miss out on. We carry the experience and the expertise that make businesses grow – from digitalizing a carpenter's business in small town Sallingsund to the launching of a robotic arm in Silicon Valley.	https://vf.dk/	vf@vf.dk

We bring together ambitious founders, experienced mentors and forward looking industry partners to build the next generation health economy companies.	https://healthfounders.ee/	info@healthfounders.ee
Prototron	Accelerator	Prototron was created to help turn smart and innovative ideas into tangible prototypes to grow into major businesses.	https://prototron.ee/	info@prototron.ee
Estban	Funding	Estonian Business Angels Network is an umbrella organization for business angels and business angel groups seeking investment opportunities in Estonia and its neighbouring regions with an aim to grow the quantity and quality of local seed stage investments. EstBAN is committed to finding, funding and mentoring great young companies from pitch through to successful exit.	https://estban.ee/	info@estban.ee
Lemonade Stand	Funding	Lemonade Stand is an angel fund with focus on B2B. We are happy to invest already in pre-product, pre-revenue phase or join a larger round at seed stage. Ambitions, experienced and diverse teams welcome!	https://lemonadestand.ee/	st@lemonadestand.ee

Lift99	Funding	Whether advising, connecting, or investing, our goal is to have the biggest impact possible. This often means helping a young founder in our community make that very first leap, and most of our investments land in the pre-seed range.	https://www.lift99.co/	tallinn@lift99.co
Superangel	Funding	Early stage investments from entrepreneurs to entrepreneurs. As a value-add for our portfolio companies, we provide expertise in customer and business development, team-building & hiring, sales & marketing and product development. We take our startups to the next level.	https://www.superangel.io/	10x@superangel.io
The Better Fund	Funding	The Better Fund is an early-stage VC fund with the goal of solving gender equality. We invest in powerful women with a big vision. Preferred areas are tech, health, environment, and education. Access to capital for women is still marginal, yet companies with at least one woman in the founding team bring higher financial returns. It's a no-brainer for us.	https://thebetterfund.co/	hello@thebetterfund.co
Thorgate Ventures	Funding	Thorgate Ventures is the venture capital arm of Thorgate, doing hands-on investments mostly into scalable B2B solutions. We are grown out of startup entrepreneurs (Seedcamp winners) and we are looking for teams that have a balance of team culture, passion, rationality, and execution power.	http://thorgateventures.com/	tallinn@thorgate.eu
United Angels	Funding	United Angels is venture capital fund, focusing on investments into promising tech startups from seed to A-rounds. We manage a fund of 16mEUR and invest throughout the software stack with primary focus on B2B, SaaS and marketplace segments.	https://unitedangels.vc/	contact@specialist.vc
Beamline	Accelerator	Beamline Accelerator is the region's only accelerator with laser focus on cleantech. Their 3-month industry-specific mentorship-driven growth program provides your team in-depth business foundation, world-wide cleantech network & 25K€ cash.	https://www.beamline.fund/	info@beamline.fund
Tallinn Business Incubators (TBI)	Incubator	Tallinn Business Incubators (TBI) is a hub for creative start-ups which helps to accelerate the growth of young enterprises and supports their expansion to international markets.	https://inkubaator.tallinn.ee/	info@inkubaator.ee
Trind VC	VC Funding	Trind VC invest in start-ups across Europe, from seed rounds all the way to sustainability, with a focus on ICT. They invest primarily Northern and Central Europe to the companies with a long-term path to a defensible competitive position. Investment start from the seed round, initially committing €0.1-0.3 million.	https://trind.vc/	trind@trind.vc
Tera Ventures	VC Funding	Estonian VC that focuses on exceptional founders from Estonia, Latvia, Lithuania, Scandinavia and CEE, disrupting digital space globally.	https://www.tera.vc/	tera@tera.vc

Spring Capital	VC Funding	Spring Capital is a hands-on venture capital & private equity firm accelerating the growth of Baltic & Nordic companies. With the Seed Fund we support scalable technology-driven startups with demonstrable traction. Our Growth Fund provides small cap private equity investments to already proven businesses with a goal to realize a new market or an M&A opportunity.	https://springcapital.ee/	invest@springcapital.ee

Real Growth Hacking	Accelerator	Build the needed foundations to scale, up-skill your entire organisation, and apply the same tactics and frameworks that billion-dollar startups used to grow their businesses.	https://www.realgrowthhacking.com/growthacceleration?gclid=Cj0KCQjw_4-SBhCgARIsAAlegUEEhIP5Z62uEdIbqwJP6hH2T30kS996TRPAph4XGMGool74IGz5MaAtgYEALw_wcB	https://www.linkedin.com/company/realgrowthhacking/
Boldbrain Startup Challenge	Accelerator	Boldbrain is an accelerator program aimed at early stage startups and innovative ideas. The target are technological innovations and the goal is to provide participants the needed tools to assess whether their idea is valid or not and if it has the prerequisites to be transformed into a scalable business. Boldbrain will provide a useful basis to start the challenging path of development of the startup.	https://boldbrain.ch/	realgrowthhacking
Axelra	Accelerator	Axelra is a tech venture builder based in Zurich and loves to build, launch and scale digital products and services and the business around it. Our approach takes 100 days from the idea to the MVP launch.	https://www.axelra.com/	https://www.linkedin.com/company/axelra/
EIC Accelerator	Funding	The EIC Fund is a unique entity owned by the European Commission and established to make direct equity investments in companies.	https://eic.ec.europa.eu/eic-funding-opportunities/eic-accelerator_en	investments@eicfund.eu
Base Launch	Funding	We partner with scientists and entrepreneurs to launch and build exceptional biotech companies	https://baselaunch.ch/	info@baselaunch.ch
Fongit	Incubator	Fongit is Switzerland's premier innovation incubator. We specialize in tech innovation in Geneva. Fongit currently supports over 100 ICT, Engineering, and Life Sciences startups and projects.	https://www.fongit.ch/	info@geneus.ch
DART Labs	Accelerator	We invest in breakthrough technologies that positively impact people and planet.	https://www.dartlabs.io/	hello@dartlabs.io

InnoPeaks	Accelerator	At the heart of the Swiss Alps, a 3-month programme for Health Tech and InsurTech startups.	https://innopeaks.ch/	https://innopeaks.ch/#contact
BlueLion	Accelerator	The perfect place for professionals to connect with like-minded people and take your start-up business to the next level.	https://www.bluelion.ch/services/program-for-entrepreneurs/LikeMinded.html	info@bluelion.ch
KickStart Innovation	Accelerator	Kickstart is one of Europe's largest zero equity, multi-corporate ecosystem innovation platforms that runs a scale-up program for later-stage startups. We offer a fast-track access to Swiss industry leaders, corporations looking for ways to collaborate.	https://www.kickstart-innovation.com/	hello@kickstart-innovation.com
Venture Kick	Incubator	Venture Kick is a philanthropic three stage funding model initiated to support Swiss startups with enough funding to kick-start their entrepreneurial success. Startups can qualify to receive up to CHF 150,000 in start capital, and an opportunity for an additional CH 850,000 in equity funding from the Kick Fund.	https://www.venturekick.ch/	https://www.venturekick.ch/
Swiss startup factory	Accelerator	After three years of experience, we have designed a completely new, customized accelerator program, based on our Swiss Startup Factory Company Building Playbook. We accelerate startups that have already validated their business model and are ready for fast growth.	https://www.swissstartupfactory.com/startup-accelerator	https://www.linkedin.com/company/swiss-start-up-factory-ag/
MassChallenge Switzerland	Accelerator	Our flagship program is the early-stage startup accelerator, which accepts startups from any industry, and in 2022 will be comprised of the agnostic program and 3 industry-specific tracks: Sustainable Food Solutions, Health Solutions and Climate Solutions. All startups in the accelerator will be advised about how to make their business climate responsible and must intend to off-set their emissions or actively reduce GHG to be considered. The program in 2022 will likely be a mix of in person and online activity due to the pandemic.	https://masschallenge.org/programs-switzerland	https://masschallenge.org/contact
Day One	Accelerator	The DayOne Accelerator supports promising ventures that combine groundbreaking technologies, healthcare expertise, and entrepreneurial spirit. We look for innovative ventures that solve problems across a broad range of healthcare areas from diagnosis, treatment, and prevention to patient and caregiver communication to improvements that directly assist healthcare workers.	https://www.dayone.swiss/what-we-do/acceleration/	https://www.dayone.swiss/contact-us/
F10	Incubator and accelerator	F10 is an ecosystem of startups, corporates, industry experts, and investors, with local hubs in Switzerland, Singapore and Spain. Its mission is to stimulate worldwide collaboration to further innovation across industries.	https://www.f10.global/startups	info@f10.global

Venture Lab	Other support	Our Venturelab programs are designed to support entrepreneurs with global ambitions, from their early-stage ideas to successful exits. Want to launch or boost your entrepreneurial journey? Pick the program fitting your needs today for networking, training, business development acceleration or fundraising.	https://www.venturelab.swiss/programs	info@venturelab.ch
Swiss Entrepreneurs Fund	Funding	The Swiss Entrepreneurs Fund invests only in start-ups and SMEs in the growth phase (internationalisation) with a financing requirement of between CHF 5-20 million. We do not make direct investments in early-stage start-ups with smaller financing requirements.	https://swissef.ch/en/fund	nicola.sprenger@ubs.com
Swiss National Science Foundation	Grant	The Swiss National Science Foundation (SNSF) funds excellent research at universities – from physics to medicine to sociology. Thousands of teams are generating knowledge for a better future for all. Together with our partners, we play a key role in shaping research in Switzerland.	https://www.snf.ch/en	desk@snf.ch
EPFL Ignition	Grant	The EPFL Ignition Grant was created to help researchers with great ideas to break free from the “too early” barrier. Too often, this is the predominant reason why such researchers never get their projects off the ground, but all of that is about to change with the Ignition Grant.	https://www.epfl.ch/innovation/startup/grants/ignition-grants/	startup@epfl.ch
Innosuisse Flagship	Grant	Innosuisse's Flagship Initiative is another of Switzerland's top grants for startups. It aims to catalyze innovation in the socio-economic sphere of Switzerland. It does so by promoting project collaboration between investors, startup founders, researchers and corporates.	https://www.innosuisse.ch/inno/en/home.html	media@innosuisse.ch
AlpVent	Funding	AlpVent AG is an investment company that invests in highly promising startups. As an investor we have a good knowledge of the CE region and the operation of innovative companies in it, with a focus on Austria and Slovenia. As the result of many years of entrepreneurial and managerial experience, we know what entrepreneurs in innovative companies need.	https://www.alpvent.com/en/about-us/	info@alpvent.com
